

**PREAMBLE**

The name of the medical device for which the claim is being made is

The virus eliminator

Description of the parts of the device
and claim

ORIGINALLY FILED
COPY OF PAPERS

The entire part consists of a piece of quartz tubing bent on itself in a circular fashion having an entrance and an exit for the flow of blood and containing a number of small indentations on the internal lumen of the tubing. This structure and design assures the greatest amount of exposure of the blood within the tube to the effect of ultra violet light
